

Predictive Service: How to service using QuickServe

Version 1

Starting Jan 2023, Cummins will provide Predictive Service insights to alert customers of components that are likely to fail in the next 90-120 days. This allows customers to plan replacement of those components during scheduled maintenance, preventing unplanned downtime. Service information for Predictive Service can be found in QuickServe Online.

Safety

As part of Cummins growing proactive repair options, Predictive Service is a recommended repair that identifies and predicts issues before they become unplanned downtime. Predictive Service notifications are identified through Cummins predictive analytics based on warranty claims and service event data for common part failures. [Click here](#) to view Warranty Memo.

Show entries Table Filter:

DSID	Alert Date	Days To Failure	Component	Recommended Action
PRG00007421	2022-09-01	290	Aftertreatment Intake NOx Sensor	Engine Out NOx sensor is expected to fail within the next 90 days kindly replace it. Refer QSOL to check for correct Part Number mounted on the Turbo Pipe
